

Geese Free™

Geese Free™ can be used year round where geese migration is present. Product will not stain, burn foliage or grass when mixed correctly. Not for use on edible crops. Visit our website and view our other great products at www.gardengirlsrepellents.com.

Mixing Instructions:

This 36oz bottle makes up to 360 gallons of ready to use product.

Truck Tanks: Fill tank with water then add product to avoid foaming. One oz. of Geese Free makes 10 gallons of ready to use product. Use entire bottle to make 360 gallons. Smaller tanks adjust accordingly. Determine psi depending on area size: 50psi - 150psi is recommended for saturation application. One gallon of RTU covers approx. 1000 sq.ft. Entire bottle will cover approx. 9 acres. Spray all grassy areas where geese land and migrate including parks, ball fields and golf courses. Can be sprayed around ponds and other areas where water is present. Do not spray directly into any body of water. Do not allow the product to contact any person directly or by drift. Re-enter sprayed area when dry. For best results apply as needed.

Mist Blowers: Add 2 oz to make 3 gallons. Add water first to avoid foaming. Shake well. Filling the mist blower 2 times will cover approx. 1 acre. Spray all grassy areas where geese land and migrate including parks, ball fields and golf courses. Product can be sprayed around ponds and other areas where water is present. Do not spray directly into any body of water. Do not allow product to contact any person directly or by drift. Re-enter sprayed area when dry. For best results apply as needed. This bottle makes 54 gallons when spraying with this method. Do not spray if bees or other pollinators are foraging in the area.

Store in a cool dry location away from heat source and sunlight. Do not store below 32 degrees. Dispose empty container according to your state's requirements for non-hazardous material.

This product is not registered with the US EPA. Garden Girls Repellents™ LLC represents that this product qualifies for 25(B) exemption under FIFRA.
